Education

Bachelor of Engineering — Automobile Engineering

Sept. 2023 – April 2027

CGPA: 7.05/10 | Relevant Coursework: Data Structures & Algorithms · OOP · DBMS · Operating Systems · Computer Networks · Web Development

Leadership & Extracurriculars

Vice Captain — SAE Bicycle Design Challenge

2025 – 2026

Velammal Engineering College | National-Level Engineering Competition

- Directed technical planning and task coordination across a 6-member team, delivering the project end-to-end for a national competition deadline.
- Applied iterative engineering analysis to improve system maneuverability — secured 2nd Prize (Best Maneuverability) against competing national teams.
- Communicated design decisions and findings to a panel of 10+ industry judges under competition pressure.

Projects

Task Manager Web Application | Node.js · Express.js · MongoDB · REST APIs · JWT · MVC

- Engineered a production-grade full-stack task management platform with secure JWT-based user authentication and complete CRUD operations, supporting 50+ concurrent test users.
- Architected RESTful APIs for task and user management with optimized MongoDB queries, reducing average API response time by ~30%.
- Applied MVC design pattern across 10+ modular components, enforcing separation of concerns and improving long-term maintainability.
- Delivered a responsive, dynamic front-end with cross-browser compatibility across 4 major browsers and mobile-first design.

Portfolio Website | HTML5 · CSS3 · JavaScript

- Developed and deployed a personal portfolio with full mobile responsiveness, smooth interactive UI elements, and zero layout-breaking issues across all major browsers.
- Applied front-end debugging best practices and semantic HTML to ensure accessibility and performance consistency across devices.

Responsive Web Interfaces | HTML5 · CSS3 · JavaScript

- Built multiple responsive web interfaces with clean UI design, interactive JavaScript features, and modular CSS structure.
- Focused on cross-device compatibility and front-end performance through systematic debugging and clean code principles.

Technical Skills

Languages: Java, Python, JavaScript (ES6+), C

Cloud & DevOps: Git, GitHub, Postman, VS Code

Web (Full-Stack): Node.js, Express.js, HTML5, CSS3, REST APIs

Core CS: DSA, OOP, Algorithms, Complexity Analysis, System Design

Databases: MongoDB, SQL (MySQL) — joins, normalization, indexing

Architecture: MVC Pattern, API-first Design, Modular Code

Certifications

- GenAI Powered Data Analytics — Tata Group
- Python for Data Science — IBM
- Data Analytics & Visualization — Accenture

Achievements

- SAE Bicycle Design Challenge: 2nd Prize — Best Maneuverability (National Level, 2025–2026).
- National Conference Paper: Presented research on Ethical Hacking & Sustainable Cyber Defense at RMK College of Engineering (2025).
- LeetCode: Active problem solver — consistent practice in DSA and algorithmic problem solving.
